Hi,

I am writing to provide my comments on the following two questions from the Discussion Paper:

14) Do you have feedback regarding the modernization of requirements to allow for electronic filing and service in most instances?

I support electronic filing and service without the need to file paper copies. Especially for lengthy documents, filing paper copies creates unnecessary work for parties and is environmentally unfriendly.

15) Do you have feedback regarding the potential removal of signature requirements in certain instances (e.g., physical signatures on applications and notice of motions)?

I support replacing the requirement for physical signatures with an option to use an electronic signature. Electronic signatures are more commonly used now than wet-ink signatures and are potentially more secure. Requiring a wet-ink signature also means that a document has to be printed and scanned which is environmentally unfriendly and creates more work for parties.

Regards,
